DESCRIBE THE PRESENT AND ORIGINAL (if known) PHYSICAL APPEARANCE

It is believed that this one-story frame, central hall plan house was constructed in two parts. The original portion, built in 1839, now forms the east half of the existing structure. This wing has two large chambers, a central entrance hall, and a central chimney. The tetra-style portico covering the entrance has square columns with molded capitals. The portico's entablature, including architrave, frieze, and box cornice with crown and bed molds, is carried around the whole building on all elevations. The exterior wall finish for both sections of the Manse is clapboarding with flush boarding under the portico. The west facade has a very fine Greek Revival doorway with double, French-type paneled doors, a transom above and a pedimented, molded frame over the door with a dog-ear detail at the intersection of the jambs and head. A wide fascia board which covers the jambs has a molded edge and flairs at the base. Windows throughout the house are six-over-six light, double-hung, sash-type with a simple molding and shutters. At some date after the original portion of the house was built, the south elevation became the principal facade. A central hall joined a two-room addition which balances the original building in size. The hall appears to have extended the depth of the south elevation chambers creating a U-shaped plan with an open area between the rear two chambers. This was filled-in at a later date. The rear doorway was moved to the end wall of the building, creating a back hall (the present dining room). Within the last decade a brick-floored porch has been added to the north elevation. This veranda extends the width of the structure. The south doorway--now the principal entrance--is covered by a tetrastyle portico with four, fine fluted Doric columns with capitals and no bases. The entablature on this portico is the same as that on the west portico. The south doorway, which is unusually wide, has three-light side windows and a ten-light transom which extends over the double doors and sidelights. The doors are double, French-type. The present doors, which do not appear to be original, have a paneled base and a large glazed panel above. The doorway molding has very elaborate carving with jamb pilasters embellished with a Greek Key motif at the top and bottom. A sun burst carving in the center of the head is flanked by raised pyramidal panels and roundal carvings at the intersection of the jambs and head. The southwest chamber also has finely carved wood work similar to the south doorway. The house is covered with a low U-shaped hipped roof. The

7.
portico roofs are hipped also. The back hall (present dining room) has a shed-type roof. The Manse, which is in an excellent state of repair, probably has some of the finest Greek Revival woodwork, particularly the south portico and doorway, to be found in the Jefferson area.

STATEMENT OF SIGNIFICANCE (Include Personages, Dates, Events, Etc.)

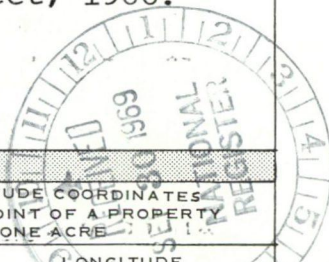

The Old Presbyterian Manse is considered to be the oldest home still intact in Jefferson, Texas. It was built by General James Harrison Rogers, a prominent lawyer in the town. Rogers made his law library available to East Texas lawyers and students who read law in his office.

In 1903 the Rogers House was bought by the Cumberland Presbyterian Church to be used as the manse. The residence served in that capacity for a half-century. Now it is owned, furnished, and maintained by the Jessie Allen Wise Garden Club. It is used as a museum and the headquarters for the Annual Historical Pilgrimage. During the Pilgrimage the historic homes of Jefferson are open to the public plus other festivities are staged. The Manse has been awarded a plaque by the Department of Interior for having superior architectural interest. In 1966 the Texas State Historical Survey Committee designated the Manse as a historic landmark.

Dear Bob:

Under separate cover we are forwarding corrections for the National Register submissions which were rechecked here in our office and found to be in error. I trust that this means of correction will not confuse the issue.

There may possibly still be errors but to date these are the only ones we have discovered. If you will notify us of any errors of which you are aware we will be glad to treat the submissions similarly.

Sincerely,

Truett Latimer
State Liaison Officer
