National Register of Historic Places
Registration Form

RECEIVED
MAR 12 1992

NATIONAL
REGISTER

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in *How to Complete the National Register of Historic Places Registration Form* (National Register Bulletin 16A). Complete each item by marking "x" in the appropriate box or by entering the information requested. If an item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. Place additional entries and narrative items on continuation sheets (NPS Form 10-900a). Use a typewriter, word processor, or computer, to complete all items.

1. Name of Property

historic name Hamilton Hotel

other names/site number N/A

2. Location

street & number 815 Salinas Street N/A not for publication

city or town Laredo N/A vicinity

state Texas code TX county Webb code 479 zip code 78040

3. State/Federal Agency Certification

As the designated authority under the National Historic Preservation Act, as amended, I hereby certify that this ☒ nomination
☐ request for determination of eligibility meets the documentation standards for registering properties in the National Register of
Historic Places and meets the procedural and professional requirements set forth in 36 CFR Part 60. In my opinion, the property
☒ meets ☐ does not meet the National Register criteria. I recommend that this property be considered significant
☐ nationally ☐ statewide ☒ locally. (☐ See continuation sheet for additional comments.)

Hamilton Hotel
Laredo, Webb County, Texas

Description:

The Hamilton Hotel is a masonry Spanish Renaissance Revival hotel with a roughly rectangular plan and a flat roof; the less dominant, 7-story block on the north side was constructed in 1923, while the main, 13-story block on the south side was constructed in 1927-1928. The foundation is concrete and the exterior walls are light red brick with decorative tile and stucco. Interior detailing, particularly in the first floor lobby, also reflects the Spanish influence. Approximately two blocks west of the Webb County Courthouse, the Hamilton Hotel overlooks Jarvis Plaza near the center of the business district. The building faces west on Salinas Street and is bounded by Houston Street to the north, an alley to the east and Matamoros Street to the south. In excellent physical condition, the Hamilton Hotel retains a high level of architectural and historical integrity.

Webb County is in southwest Texas on the south plains, across the Rio Grande from Mexico. Topographical features in this area are characteristic of the interior lowlands; the county's rolling terrain is covered with brush. The area surrounding the Hamilton Hotel exhibits topographical features common to South Texas settlement. Laredo (1990 population 116,698), on the north bank of the Rio Grande, serves as county seat and as the region's economic hub, based on agribusiness, manufacturing, and service industries. The central business district follows a strict rectilinear plan laid out on the cardinal directions, and is generally flat with little variation. The building was advantageously placed at the northeast corner of Jarvis Plaza, the focal point of several important local buildings including the 1906 Federal Building, just blocks away from the intersection of several railroad tracks. (See USGS map.)

The 1927-1928 main building's form is that of a 3-part vertical block. Its 2-story base at the south and west facades is heavily ornamented (see Photograph 1). Although the original store fronts have been altered, round brick arches with keystones, above the elaborate copper marquee, mark the original fenestration pattern. Surrounding these arches and on the 2nd level are glazed tile and mosaic panels that depict flora and fauna (see Photograph 2).

The eight stories of the midsection shaft bear 4/4 wood windows with vertical muntins; these windows provide a continuous rhythm around the building that accentuates verticality. Above each window on the south facade is a spandrel of ornamental stucco and tile, these spandrels are also above each window on the three northernmost and southernmost bays of the west facade.

Stylized tile pilasters delineate the bays on the 3-story "capital" of the main building. Round arches surmount the upper row of windows above which the flora and fauna glazed tile and mosaic panels continue. Similar 1-story, square towers delineate the northwest and southwest corners at the peak of the building. Each has a red barrel tile roof and small 2-story octagonal tower. A stucco wall acts as parapet with brick coping. Cast stone pinnacles, balconies, and oriel bays further decorate the parapet (see Photograph 3).

United States Department of the Interior

National Register of Historic Places
Continuation Sheet

Section number 7 Page 2

Hamilton Hotel
Laredo, Webb County, Texas

Neither the east nor the north facades of the main building bear such detailed ornamentation, but each has 2/2 wood windows, continuing a vertical rhythm (see Photograph 4). The north facade abuts the 1923 (south) block of the building.

The south block of the building follows the form of a 2-part vertical block. The foundation is concrete and the exterior walls are yellow brick (see Photograph 5). The north and west facades exhibit modest ornamentation. Some of the original storefront windows have been altered, but the elaborate copper marquee above continues along the west facade from the 1927-1928 main building. Above the marquee is a cast stone belt course that wraps around to the north facade. The six upper stories of the west facade have rows of paired 6/1 wood windows, while the upper stories of the north and east facades have rows of single 6/1 wood windows. A brick cornice with dentils tops the parapet.

Alterations have not obscured all of the original elaborate ornamentation of the interior public spaces in the Hamilton Hotel. The terrazzo floors and ornamental tile chair rail provide a sense of the lobby's earlier adornment, as does elliptical vaulting with plaster ribs stained to imitate wood (see Photograph 6). Elevators installed in 1924 still survive. Later alterations include enclosing previously open space, such as the ballroom and sample rooms. A noticeable exterior modification is the removal of original storefront windows; however, this disturbance does not detract from the overall distinction of the building. The Hamilton Hotel conveys its significance through its integrity of location, design, setting, materials, workmanship, feeling and association.

8. Statement of Significance

Applicable National Register Criteria

(Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing.)

- ☐ A Property is associated with events that have made a significant contribution to the broad patterns of our history.
- ☐ B Property is associated with the lives of persons significant in our past.
- ☒ C Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- ☐ D Property has yielded, or is likely to yield, information important in prehistory or history.

Criteria Considerations N/A
(Mark "x" in all the boxes that apply.)

Property is:

- ☐ A owned by a religious institution or used for religious purposes.
- ☐ B removed from its original location.
- ☐ C a birthplace or grave.
- ☐ D a cemetery.
- ☐ E a reconstructed building, object, or structure.
- ☐ F a commemorative property.
- ☐ G less than 50 years of age or achieved significance within the past 50 years.

Narrative Statement of Significance See Continuation Sheets 8-3 through 8-5.
(Explain the significance of the property on one or more continuation sheets.)

9. Major Bibliographical References

Bibliography See Continuation Sheet 9-6.

(Cite the books, articles, and other sources used in preparing this form on one or more continuation sheets.)

Previous documentation on file (NPS): N/A

- ☐ preliminary determination of individual listing (36 CFR 67) has been requested
- ☐ previously listed in the National Register

Hamilton Hotel
Laredo, Webb County, Texas

Statement of Significance:

The Hamilton Hotel, constructed in phases between 1923 and 1928, is an exceptional example of a Spanish Renaissance Revival building in downtown Laredo. The building, bearing skillful treatment of form, scale and ornamentation, meets Criterion C in the area of Architecture as one of the best illustrations of commercial design in the city and as the work of master architects Atlee B. and Robert M. Ayres.

Prior to its official organization, the Webb County area had been under Mexican rule, part of the state of Tamaulipas. In the 14 May 1836 Treaty of Velasco the Republic of Texas claimed the area. Permanent Anglo-American settlement began about 1845 following statehood. The establishment of Fort McIntosh on 3 March 1849 led to securing the Rio Grande as the southern boundary of Texas.

Both the Texas-Mexican Railway and the International-Great Northern Railway reached Laredo in 1881 and the following year the Rio Grande and Eagle Pass Railway was built. The result was unprecedented growth in the community and the need for many services including hotels. J.M. Hamilton constructed the Hotel Hamilton on the south corner of the block sometime between 1885 and 1889. The 3-story brick and frame building had Victorian-era detailing and a detached kitchen. (Photographs of this building are on file at the Institute of Texas Culture in San Antonio.) The hotel was expanded to the east (this expansion is now the extant Southern Hotel) between 1905 and 1909. In 1916, Milus Little purchased the hotel; he had previously been responsible for constructing the Little Hotel, the J.C. Penney Building, and the Bender Hotel in Laredo. Little and his partner, L.L. Stephenson, began plans for further expansion of the Hamilton Hotel that would not come to fruition until the 1920s.

The 1920s was an era of unrivaled prosperity across the United States paralleled by commercial growth and consequent construction booms. Laredo flourished as an urban center. The economy thrived on the numerous rail systems that ran through town, affording transportation for local industries and international travelers.

In 1923, a 7-story building (connected to the north side of the 19th century building) was constructed at the north end of the block. The architect for this project remains unknown, although Charles H. Page and Company, an important Austin architect, solicited a bid for a 4-story hotel to Little. George Walling, another noted Austin architect, may have also worked on this project.

As the decade progressed the need for more hotel space increased and the owner responded. Architects Atlee B. Ayres & Robert M. Ayres, San Antonio's most prominent architectural firm, designed this monumental 13-story building in the place of the 19th century building. A draftsman with the architects' office was assigned to the project and worked with the general contractors, C.M. Schoenfeld of San Antonio.

Continuation SheetSection number 8 Page 4Hamilton Hotel
Laredo, Webb County, Texas

Robert and his father, Atlee Ayres, were two of Texas' most important architects in the 20th century; their work left a lasting impact on South Texas' distinctive Spanish-influenced building designs. Atlee Ayres (1873-1969), born in Hillsboro, Ohio, came to San Antonio with his parents in 1888. As a collegian, he took courses at the Metropolitan School of Art in New York City, a subsidiary of Columbia University. There he won first prize in the school's annual design competition. His teachers included William Ware, a student of Richard Morris Hunt. He took drawing lessons at the Art Students League and studied painting under Frank Vincent Dumont. Following his 1894 graduation, he returned to San Antonio briefly, working for other architects and then practicing in Mexico until 1900. He shared a firm with C.A. Coughlin from 1900 until 1905 when Coughlin died. Atlee then practiced alone in San Antonio designing the 1906 Heimann Building, the 1909 First Presbyterian Church, and numerous residences for prestigious San Antonio citizens like Colonel George W. Brackenridge. He was appointed State Architect of Texas in 1915, which allowed him opportunities to design several buildings for the state. In 1922, when son Robert (1898-1977) graduated with an architecture degree from the University of Pennsylvania, they joined in partnership. In 1926 Atlee published Mexican Architecture, a collection of photographs, drawings, and texts on buildings of colonial Mexico.

The Ayres team designed many important buildings in San Antonio, including the 1925 Municipal Auditorium (National Register 1981), the 1927 Plaza Hotel, the 1928 Federal Reserve Bank Building, and the 1931 Administration Building at Randolph Field, known as the "Taj Mahal" (National Register 1987). Their work outside San Antonio includes the Blind Institute and, on the University of Texas campus, Carothers Dormitory and the Pharmacy Building in Austin; county courthouses in Kingsville, Alice, Refugio, Del Rio (National Register 1977), and Brownsville (National Register 1980); and Episcopal churches in Kerrville and Corpus Christi. In addition, the architects designed several hundred homes in San Antonio and other cities and became strongly associated with distinctive and prevalent Spanish traditions of composition.

Their 1923-1928 hotel is a mature example of a 3-part vertical block building, the most predominant form for large commercial buildings in the 1920s. Its composition is analogous to the units of a classical column with an obvious base, an elongated midsection, and a distinct upper zone. The base originally framed wide-windowed retail space between structural piers and is set off from upper stories by a strong horizontal motif. The tower shaft consists of identical superimposed stories for hotel rooms that outline the building's vertical spirit. The upper zone is decorative in finish. Engulfed in vigor, progress, and capitalism, this silhouette became the embodiment of 20th century America for a town the size of Laredo.

The hotel exhibits features typical of the Spanish Renaissance Revival style including a red barrel tile roof and the asymmetry in the treatment of towers, balconies, pinnacles, and oriel bays. Renaissance inspired, glazed tile and mosaic ornament give the building a rich and colorful individuality.

Continuation Sheet**

Section number 8 Page 5

Hamilton Hotel
Laredo, Webb County, Texas

The 1915 Panama-California Exposition in San Diego that imitated elaborate Spanish prototypes with precision influenced the Spanish Renaissance Revival architecture of the hotel. Exposition designer Bertram Grosvenor Goodhue, well versed in Spanish Colonial architecture, used the exposition to explore more richly detailed Spanish precedents. The Exposition's positive publicity inspired architects like Ayres & Ayres to translate architectural traditions directly from Spain. The popularity of the style peaked in the 1920s and 1930s.

Still one of the most prominent buildings on the Laredo skyline, the building retains a high degree of architectural and historical integrity. Its construction marked the transformation of the community into a flourishing metropolis. The Hamilton Hotel serves as a reminder of the exuberant, optimistic expectations that characterized urban landscapes prior to the Great Depression.
